

ROMESHIKA CHATHURANGANI

ABEYGUNARATHNA

UI/UX Designer

BEng (Hons) Software Engineering Graduated

ABOUT ME

A creative UI/UX Designer dedicated to crafting designs that feel natural, functional, and delightful. I focus on understanding user behavior through research and transforming insights into clean, engaging interfaces. My design style emphasizes clarity, simplicity, and a seamless user journey across devices.

EDUCATION

Informatics Institute of Technology
BEng(Hons) Software Engineering
Second class Devision
2021 - 2025

Esoft Metro Campus
Diploma in information Techonology
(DiTEC)
2021

President's college Embilipitiya
GCE Ordinary Level
Results: 6A 2B C
GCE Advanced Level - Physical Science
Results: C 2S
English: C

EXPERIENCE

- **Trainee Software Engineer**
SLTMobitel Digital Lab
Sep 2023 - Dec 2023

 - Worked as a Full-Stack Software Engineer on the redevelopment of the APISIX platform, contributing to RESTful API development and frontend implementation. Collaborated on building responsive, user-friendly interfaces while ensuring performance and scalability using React and Node.js.
- **Creative UI/UX Designer Intern**
Gamage Recruiters
Dec 2023 - Dec 2024

 - Designed visually appealing and user-centered UI components for recruitment platforms and internal web applications, focusing on usability, visual consistency, and modern design principles. Created user flows, wireframes, and interactive prototypes using tools such as Figma to ensure design feasibility and a seamless user experience.

PROJECTS

- **Face Recognition-Based Attendance System**
(Final Year Project)

 - Developed a machine learning-based, contactless attendance system to eliminate proxy attendance and improve accuracy in educational environments. Implemented MTCNN for face detection and FaceNet for facial embedding generation, with SVM for classification and an LBPH-based pipeline to enhance performance under low lighting and image quality variations. The system supports real-time recognition with high accuracy and robust performance across diverse conditions. (Python, Machine Learning, MTCNN, FaceNet, SVM, LBPH, OpenCV, SQLite)
- **TravelTales - Tourism Blogging & Social Platform**

 - Designed and developed a full-stack tourism blogging and social networking platform that allows users to share travel experiences enriched with real-time country data. Implemented secure user authentication, blog management, social interactions (likes, comments, follows), and personalized feeds. Focused on scalable architecture, clean UI, and secure RESTful API design. (Node.js, Express.js, API/Axios, SQLite, HTML, CSS, JavaScript)

TECHNOLOGICAL SKILLS

HTML5 / CSS	Figma	Python
MySQL / PHP	Excel	Java
JavaScript	React	Git

LANGUAGE

- Sinhala
- English

EXTRA ACTIVITIES

- Participate Bootcamp workshop by devTown
- Microsoft Imagine Cup - 2023
- IEEE CodeSprint - 2023

Diabetes Self-Care Mobile Application

- Developed a cross-platform self-care management application for Type 1 diabetes patients and parents, integrating machine learning for health insights and tracking. The app supports monitoring, guidance, and improved patient engagement through an intuitive mobile interface. (Python, Machine Learning, JavaScript, React Native, Firebase)

Ceylon-Travel Web Application

- Collaborated in a team to design and develop a responsive travel website with a focus on usability and visual design. Implemented modern UI layouts and ensured cross-device compatibility.(HTML5, CSS3, JavaScript, Figma)

Hometeq – Online Reselling Platform

- Developed a web-based online reselling application featuring product listings and database-driven functionality.(HTML5, PHP, SQL)

Crypto Trading Mobile Application (UI Design)

- Designed a cryptocurrency trading mobile application inspired by Binance, emphasizing clear information hierarchy, intuitive dashboards, and accessible trading workflows for both beginner and experienced users. Developed interactive prototypes to demonstrate real-time data visualization and user interactions.(Figma, Prototyping)

Car Rental Mobile Application (UI Design)

- Designed a mobile application for car rental services with a streamlined booking experience. Created clear user flows for vehicle selection, booking, and confirmation while prioritizing ease of use, minimal user effort, and modern UI standards.

Animation Movie Streaming Mobile Application(UI Design)

- Designed a mobile application for streaming animated movies with engaging visuals and smooth navigation flows. Focused on enhancing user engagement through clean layouts, effective content organization.

Sweet Donut Mobile Application (UI Design)

- Designed a visually appealing mobile application for ordering donuts and desserts, using vibrant color palettes and modern UI components. Focused on intuitive navigation and an enjoyable user experience from menu browsing to order placement.

ROMESHIKA ABEYGUNARATHNA

UI/UX DESIGNER

COVER LETTER

Dear Sir/ Madam,

I am writing to express my interest in the Associate / Junior UI/UX Designer position at your organization. I am currently completed my BEng (Hons) in Software Engineering at the Informatics Institute of Technology with Second class Division and have hands-on experience in UI/UX design through both industry internships and academic projects. I am passionate about creating intuitive, user-centered digital experiences that balance functionality with visual clarity.

I have worked as a Creative UI/UX Designer Intern at Gamage Recruiters, where I designed user-centered interfaces for recruitment platforms and internal web applications. My responsibilities included creating user flows, wireframes, and interactive prototypes using Figma, while closely collaborating with stakeholders to translate business requirements into effective design solutions. This experience strengthened my understanding of usability, consistency, and modern design principles.

Previously, I worked as a Trainee Software Engineer at SLTMobitel Digital Lab, where I contributed as a full-stack developer to the redevelopment of the APISIX platform. I was involved in RESTful API development and frontend implementation using React and Node.js, which gave me strong technical insight into how designs are implemented in real-world applications. This background allows me to collaborate effectively with developers and ensure design feasibility.

In addition to my industry experience, I have completed several UI/UX and software engineering projects, including a Face Recognition-Based Attendance System (Final Year Project), the TravelTales tourism blogging platform, and multiple UI-focused mobile application designs such as cryptocurrency trading, car rental, animation streaming, and e-commerce apps. These projects demonstrate my ability to apply design thinking, problem-solving, and technical skills to real-world scenarios.

I am eager to bring my creativity, technical understanding, and passion for user experience to your team. I would welcome the opportunity to contribute to meaningful products while continuing to grow as a UI/UX professional. Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experience can add value to your organization.

Best Regards,
Romeshika Abeygunarathna.
